ROYAL FX

Human Traders vs. AI Bots

01

Efficiency: Bots can process and analyze vast amounts of data much faster than humans.

02

Emotionless Trading: Unlike humans, bots are not swayed by emotions, ensuring decisions are based purely on data.

03

24/7 Operation: Cryptocurrency markets never sleep, and neither do bots, allowing for continuous trading.

04

Adaptability: Advanced bots can learn from market patterns and adjust their strategies accordingly.

ABOUT US

❖ We mainly use the 120-second trend of BTC short-term trading to choose to go up or down. For example: 2 minutes ago, the price of BTC was \$19,000. We choose to trade up \$500. When the price of BTC is higher than \$19,000 after 120 seconds, we will get a profit of \$450. Its advantage is that it will not show more ups and downs than long-term holding of BTC, and the operation is very simple. Following the analyst's trading guarantees that your profit rate reaches more than 90%.

Our experience in crypto industry is about 6 yrs..

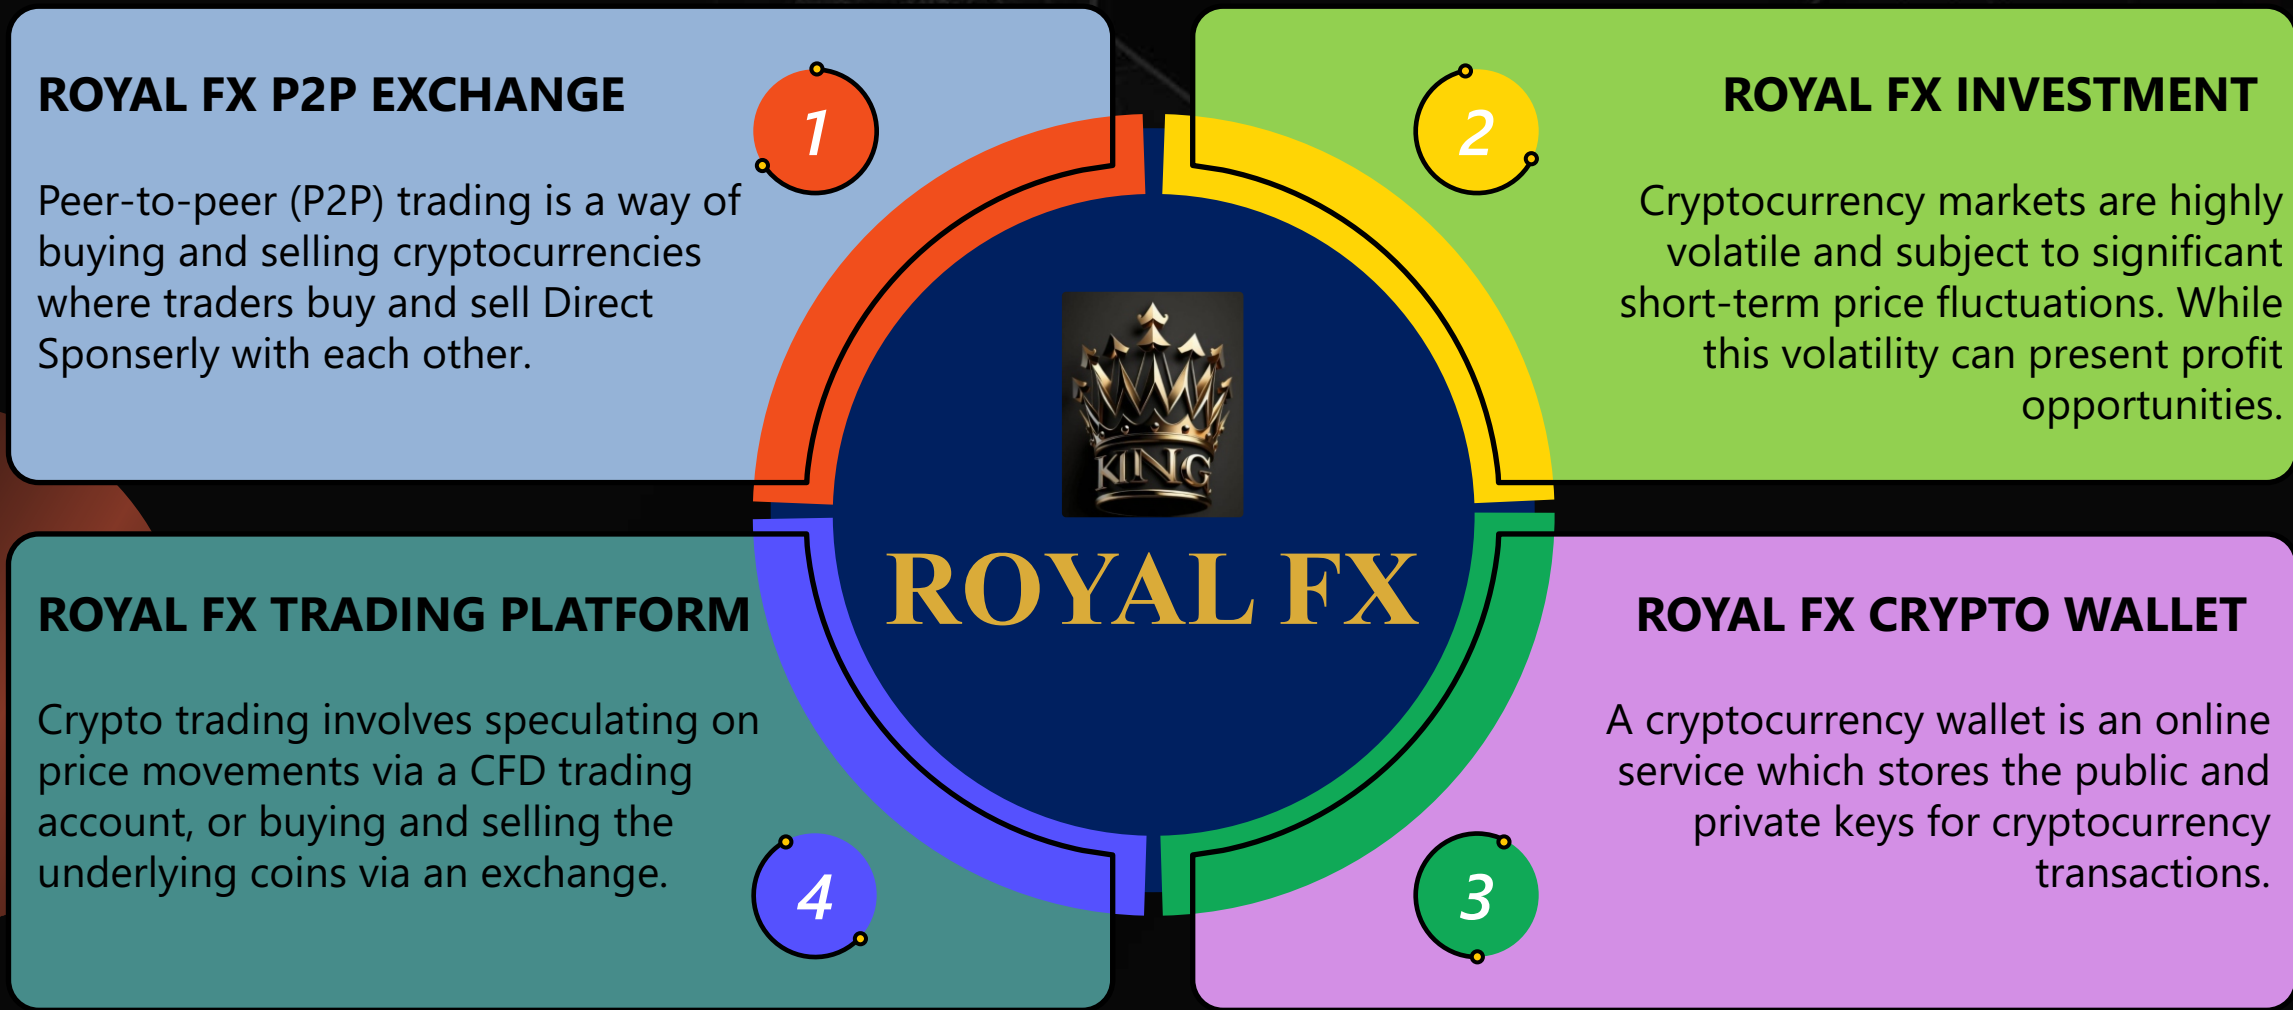

We are running Person to Person Crypto Currency Exchange.

We guide and help provided by the analysts.

We are not investing in the price of cryptocurrency.

But using its up and down to make huge profit in a short period of time.

Opportunities
